**1**

Diagram showing the fixture being mounted to a wall using screws. A screwdriver is shown driving a screw into the wall through the fixture's mounting holes.

**2**

Diagram showing the fixture being connected to a power supply. The power supply is connected to the fixture's terminals. The fixture is then mounted to the wall. A circular inset shows the wiring connections: L (Live), N (Neutral), and a ground symbol. A 'push' arrow indicates the terminal cover should be pushed down.

**3**

Diagram showing the final view of the installed fixture, mounted to the wall.
